**COLOR BROADBAND IS SELECTED BY THE CITY OF LONG BEACH
FOR WIRELESS “HOT ZONE” PROJECT
ON PINE AVENUE AND LONG BEACH AIRPORT**

Long Beach, Ca, November 25, 2002 –Color Broadband, Inc. was selected by the City of Long Beach for the Broadband connection of it’s new wireless Technology Project called the “Hot Zone” on Pine Avenue as well as at the Long Beach Airport. Long Beach Business Development Center recently rolled out two of the first City Based Wireless to Wireless Internet Zones in the World. “We are pleased to serve Long Beach and its plan to develop a truly progressive technology environment, ” stated Color C.E.O. Fran McGrath. It is now possible to stroll down Pine Ave., Sit at an outdoor Café, sip a latte, and check movie times or your e-mail, added McGrath. “The Colorbroadband Broadcast Fiber system is the perfect platform for this type of Application. Color Broadband services will also be utilized in Co-Locating and supporting the City network infrastructure, and assisting in technical support for any log on clients to the Hot Zone.”

Color Broadband’s products and services range to facilitate Wireless Broadband connections anywhere. Color Broadband is often utilized when someone is having a difficult time getting a strong or reliable connection with their DSL or T-1 provider. The city of Long Beach is an excellent example of a client in need of a flexible and powerful provider for Broadband Internet connectivity. McGrath added, “I believe Color Broadband Inc is providing a very valuable connection asset to the city and the businesses in Long Beach. We also have coverage in Los Angeles, and Orange County. It is being said that wireless is the future of connection. We make it possible to do futuristic things right now.”

Color Broadband Inc. is a privately held franchise company based in Long Beach, California, offering High-Speed Broadband Internet Connectivity, Terabyte Storage, Wireless IP Video Surveillance, Network Consultation, and other specialized services.
